Description

The VILLAS administrative project comes from the workshop of the Aulík Fišer Architects architectural studio. It consists of a set of two houses (from 2002) interconnected by a common ground floor and the third building, the RESIDENCE BB CENTRE residential building. In two office buildings, a total of 8,000 m² of rentable space is available on six floors above ground and 218 parking spaces on the underground floor. The architecturally very balanced construction of both buildings allows variable modifications of the space of the individual floors according to the requirements of the tenant.
